

I am a strong supporter of Sattelitelte supplied news and weather. Just as the weather channel provides sattelite televised weather while I am at home, the indepth traffic and weather while I am in my vehicle when I need it most. The traffic specifically is very important and allows me to know specific troublespots when I need to be at a location. I must please ask that the Sattelitelte features under attack be left alone.

Thank you,

Christopher M Weisman
